State & Local News

◆ AUB SAYS POWER BILLS WILL RISE IN DEC.

AUB says the per kilowatt hour rate for AUB power will increase in December versus the current month of November by a little more than two-tenths of a cent per kilowatt hour. AUB's Wayne Scarbrough said that the increase is the result of two rising components, the base rate and the TVA fuel charge, both of which will be higher than in November. The average energy use by AUB residential customers is 1160 kilowatt hours per month. For this average use, a customer would see a rise in their December power bill of \$2.86 more than in November.

◆ FHA IS LATEST AGENCY TO GO BROKE

Tennessee's Senator Bob Corker says that the Federal Housing Administration has exhausted its reserves and may have to start drawing on taxpayer resources in order to make any more loans. Corker says that the FHA's economic value is now negative. He says the government and the administration have put off fundamental housing finance reform for too long. Corker says that having the federal government make loans to people who can't pay them back isn't good for homeowners, communities, or the country.

NATIONAL & WORLD NEWS

◆ Lawmakers have seen a video made from drone surveillance and security cameras, which showed them in real time, the attack in Libya that killed four Americans, including the ambassador.

◆ Three people were killed as Israel launched a punishing campaign of airstrikes on militant targets across the Gaza Strip. Palestinian militants have barraged Israel with more than 200 rockets. The densely populated Tel Aviv area was targeted. The brazen attacks by militants are threatening to trigger an Israeli ground invasion of Gaza.

◆ The White House has issued a statement that throws its full support behind Israel's reaction to that barrage of rockets fired by Hamas.

◆ Today is the deadline for states to declare their intentions about Obamacare. If a state opts out, the federal government will step-in and create a federal exchange for that state. The states that have already opted-out say that they can't afford the cost of Obamacare.

◆ The struggling U.S. Postal Service reported an annual loss of a record \$15.9 billion and forecast more red ink in 2013, capping a tumultuous year in which it was forced to default on billions in payments to employees future health benefits, in order to avert bankruptcy. The postal service has reached the limit on its ability to borrow more funds and is operating with little cash on hand, putting it at risk of total collapse in the event of an unexpectedly large downturn in the economy.
