### ◆ RECENT LOW TEMPS AFFECT POWER BILLS

While warmer weather is beginning to take hold, the low temperatures in February and March increased heating demand in the area and that will be reflected in your next utility bill. AUB spokesman Wayne Scarbrough says their meter readers report that use of electricity and natural gas over the past six weeks is up considerably compared to the same time last year. Scarbrough says over the past six weeks, the average daily low was 30 degrees with a low of 15 degrees on February 17th. He says you may be shocked when you open your next utility bill to find out how much gas and electricity you used for heating.
