**McMinn County Rabies Clinic
On May 4-9**

The McMinn County Health Department has announced its annual rabies vaccination clinic will be held Monday, May 4 through Saturday, May 9, offering reduced-cost vaccinations for dogs and cats at participating veterinary offices across the county.

Rabies shots will be available during regular business hours at multiple clinics, including The Animal Clinic of Athens, Athens Small Animal Hospital, Family & Friend Pet Clinic, Mecca Pike Animal Hospital, Offutt Veterinary Clinic, and Sweetwater Veterinary Hospital. Vaccinations at these locations will cost \$12.

A \$15 vaccination will be offered at the McMinn Regional Humane Society Spay and Neuter Clinic for animals that have been spayed or neutered.

Officials encourage pet owners to call ahead to schedule appointments. The reduced pricing is only available during the clinic dates.

State law requires all dogs and cats to be vaccinated against rabies, with initial vaccinations recommended after three months of age. For more information, contact the McMinn County Health Department at 423-618-3189.

Tennessee Senate Approves Biomarker Testing Expansion Bill

The Tennessee Senate has unanimously passed legislation expanding access to biomarker testing, sending the measure to Gov. Bill Lee for consideration. Senate Bill 0435, approved on a 30-0 vote, would require coverage of biomarker testing for patients on TennCare and state employee health insurance plans. A companion bill has already passed the Tennessee House.

Biomarker testing helps doctors identify the most effective treatments—particularly for cancer patients—by analyzing genetic and molecular markers. Advocates say the approach can improve outcomes, reduce ineffective treatments, and is increasingly used for other conditions such as Alzheimer's disease and arthritis. Supporters, including the American Cancer Society Cancer Action Network, say expanded coverage will improve access to life-saving care. Lung cancer survivor Stephen Huff of College Grove credited the testing with extending his life and allowing more time with his family.

If signed into law, Tennessee would join more than 20 states that have enacted similar legislation, expanding access to advanced diagnostic tools for patients statewide.
